PROFESSIONAL EXPERIENCE

Senior Software Engineer

Feb 2021 – Present

JP Morgan Chase & Co. — Plano, TX

- Architected and built **GKP-Service** from scratch — a Java microservice with two endpoints (one serving Wolverine, one running an ETL batch job to populate the database hourly with Kubernetes data) — enabling Wolverine's full Kubernetes feature set for thousands of users and opening cross-team collaboration opportunities firm-wide.
- Leading development of **One-Touch Repave** for GKP-Service, enabling users to clone Kubernetes namespace configurations to a target cluster with a single action; built Java foundation and sanity tests, with planned enhancements for pre-clone resource validation and granular status logging.
- Led team delivery of **Token as a Service**, centralizing token generation across all backend microservices and eliminating duplicated auth logic firm-wide.
- Designed **group-based scheduling** for Wolverine, enabling thousands of users to define task groups with parallel/sequential/cross-group dependencies for complex failover workflows (e.g., coordinated load balancer disabling and app shutdown sequences).
- Developed **Lightswitch+**, automating Kubernetes scaling via cron schedules — 1,000+ API calls/hr across 5,000+ users; saved the firm **\$5M in 2024**.
- Built fully automated service update pipeline; led resiliency initiatives and KT sessions; built hygiene automation app (Java Spring / Angular / MariaDB) with Grafana + Dynatrace observability.
- Achieved 80%+ test coverage, reducing user-reported issues by 20%; improved seal ID onboarding by 80%; deployed across dev/UAT/prod on GAIA and monitored Splunk alerts on-call.

Software Engineer Intern

Jun 2020 – Aug 2020

Textron Systems — Sterling, VA

- Automated HTTP API tests via Postman for SeeGEO; built Docker/Python/Locust endpoints; deployed on Azure, AWS, and on-premises infrastructure.
- Indexed NGINX logs into Elasticsearch with real-time Kibana dashboards; worked in Agile/CI-CD environment using Azure DevOps.

PROJECTS

TripSync — Full-Stack Personal Project

2025 – Present

React · Spring Boot · Java

- Group travel coordination app with real-time **availability heatmap**, **destination voting**, glassmorphism UI, and code-based group invitations; RESTful Spring Boot backend supporting multi-city itinerary coordination.

EDUCATION

Georgia Institute of Technology — M.S. Computer Science (OMSCS)

Expected 2027

University of Texas at Dallas — B.S. Software Engineering, *Cum Laude*

December 2020

TECHNICAL SKILLS

Languages: Java · Python · TypeScript · JavaScript · HTML/CSS · C# · C++

Frameworks & Cloud: Spring Boot · Angular · React · Node.js · Kubernetes · AWS · Azure · Gaia Pool · MySQL

Tools: Grafana · Dynatrace · Splunk · GitHub · Bitbucket · Jira · Postman · OpenAPI · CI/CD · Agile · Android Studio

ADDITIONAL

Software Engineer Program Training — **Flow Monster Winner** | JP Morgan Chase & Co., 2021 · Award of Excellence for Best Executive Officer — Bangladeshi Student Organization | UT Dallas, 2019
